

# Amoeba-Tox

Concentrated Homeopathic Medicine

2 oz. NPN 80046356

## Patient Reference

### Detoxifier Homaccord Tincture **Multiple Water-borne Parasite Detoxification**

The Homeopathic Pharmacopoeia Convention of the United States defines detoxifier homaccords as "homeopathic attenuations of: pathological organs or tissues; causative agents such as bacteria, fungi, ova, parasites, virus particles, and yeast; disease products; excretions or secretions." Isopathic remedies share a close relationship with detoxifier homaccords, however, they emphasize substances taken and potentized from the patient's surround such as environmental toxins, metals, imponderables, etc. Detoxifiers presented in this section are a combination of classical homeopathic preparations in a 60 mL cobalt blue bottle (protects the remedy) which may include detoxifier homaccords isodes, sarcodes and potentized botanicals all designed to differentiate, constellate and amplify the keynote focus of the remedy. All ingredients are made from mother tinctures, hand diluted as per Hahnemann and hand succussed. Many are in multiple potencies known as homaccords to provide for the processes and patterns of homeopathic ascendancy. *Potentized Mesenchyme 6X, 9X, 6C and ATP 5X are included to assist in homeopathic ECM drainage and homeopathic empowerment.*

Amoeba are single celled, water-borne organisms, commonly found in the environment. These organisms live in lakes, streams, rivers and other water sources, feeding off of particulate matter and bacteria that they ingest via phagocytosis.

Pathogenic forms of amoeba are transmitted from person to person via fecal contamination of water and food, either from direct consumption or accidental inhalation of water during bathing or swimming in contaminated waters. Protozoans can be found in the intestines, lungs, muscle tissue and the digestive tract, releasing toxins and tissue destroying enzymes.

Microscopic protozoans harm more people than any other parasitic disease. The cyst or resting stage of this parasite is very resistant to temperature, dryness and chemicals, which are found everywhere in our environment. People ingest these cysts, which then "hatch" in our bodies. Although we are commonly exposed to protozoas, our immune systems usually keep them under control. Individuals with a weakened immune system or toxic condition cannot fight off these parasites as effectively as those with healthy systems.

In 1997, the World Health Organization reported that *Entamoeba histolytica* was responsible for up to 100 000 deaths per annum, placing it second only to malaria in mortality and morbidity from parasitic infections.

Reports indicate that North Americans play host to a similar percentage of single cell parasites (amoeba) as do the inhabitants most third world countries.

*Cryptosporidium, Giardia and Entamoeba histolytica* are the most well known parasitic amoeba infecting human hosts and causing disease. While some cases do not produce symptoms, infection can result in ulceration of the intestinal tract, severe diarrhea, intestinal cramps, nausea, malaise and fever. *Entamoeba gingivitis*, another common protozoa sits in the soft tartar between the teeth and the oral mucosa and is associated with the development of amoeba gingivitis.

Amoebic dysentery is characterized by the passage of blood and intestinal mucosa with the stools. In invasive conditions, some organisms are able to penetrate the bowel and migrate to the liver, lungs, brain, pericardium, and other tissues. Amoebic colitis, characterized by intermittent bouts of diarrhea over a long period of time, is often misdiagnosed as ulcerative colitis, irritable bowel syndrome and Crohns' disease.

It is suggested that all clients/patients presenting with arthritic patterns be checked for passive leaky gut and consequent infection with Candida and water borne parasites.

*Amoeba-Tox* is a powerful detoxifier homaccord designed to effectively address the presence of multiple water-borne parasites in the body. Multiple homaccords for the most common water-borne parasites alert the body to the presence of these organisms, while homeopathic herbs, sarcodes and polychrests assist in the drainage and elimination of these water-borne parasites at the correct cellular levels.

#### Ingredients:

Adrenal 6X  
Amoeba 30X, 60X, 200X  
Artemisia absinthium 6X  
ATP 5X  
Baptisia tinctoria 3X  
Capsicum annuum 3X  
Cajuputum 1 cc

Cassia acutifolia 3X  
Chelone glabra 3X  
China officinalis 12X  
Fragaria vesca 3X  
Gentiana lutea 6X  
Hydrastis canadensis 3X  
Intestinal mucosa 6X, 12X, 30X, 6C  
Liver 5X

Lycopodium clavatum 12X  
Mesenchyme 6X, 9X, 6C  
Nux vomica 12X  
Quassia amara 3X  
Spleen 5X
