

Bacteria-Tox

Concentrated Homaccord Tincture
2 oz. NPN 80047578

Patient Reference

Detoxifier Homaccord Tincture

Multi-Dimensional Bacterial Detoxification

The Homeopathic Pharmacopoeia Convention of the United States defines nosodes as "homeopathic attenuations of: pathological organs or tissues; causative agents such as bacteria, fungi, ova, parasites, virus particles, and yeast; disease products; excretions or secretions." Isopathic remedies share a close relationship with nosodes, however, they emphasize substances taken and potentized from the patient's surround such as environmental toxins, metals, imponderables, etc. Detoxifiers presented in this section are a combination of classical homeopathic preparations in a 60 mL cobalt blue bottle (protects the remedy) which may include nosodes, isodes, sarcodes and potentized botanicals all designed to differentiate, constellate and amplify the keynote focus of the remedy. All ingredients are made from mother tinctures, hand diluted as per Hahnemann and hand succussed. Many are in multiple potencies known as homaccords to provide for the processes and patterns of homeopathic ascendancy. *Potentized Mesenchyme 6X, 9X, 6C and ATP 5X are included to assist in homeopathic ECM drainage and homeopathic empowerment.*

Bacteria can be found virtually everywhere in the environment. These single celled organisms have been isolated from the highest mountains and the deepest depths of the sea, at all ranges of temperatures and pH. Many of the trillion types of bacteria are helpful. They are instrumental in the cycling of nutrients in soils and help to maintain a steady balance in the ecosystem both on land and in water. They play important roles in human health as well, assisting with the digestive process, production of certain nutrients in the intestinal tract and in helping the immune system to fight off pathogenic organisms.

Pathogenic bacteria, however, are responsible for a multitude of disease conditions. These organisms infect a number of organs and systems in the body, for example:

- *Campylobacter*, *Salmonella* and *Escherichia coli* affect mainly the gastrointestinal tract and are most commonly associated with food poisoning
- *Streptococcus* bacteria affect the mouth, nose, throat and upper respiratory tract
- Lyme disease is caused by the spirochete bacteria *Borrelia burgdorferi* and affects mainly the skin and musculoskeletal system

Cholera, tuberculosis, typhoid fever, bacterial pneumonia, tetanus, otitis media and cystitis are additional examples of bacterial infection.

While antibiotics are sometimes necessary, homeopathic treatment for bacterial infections holds many advantages over conventional treatment with antibiotics:

- 1) Does not promote the evolution of resistant stains
- 2) No immuno-suppression caused by the destruction of beneficial gut microflora
- 3) Supports the body's natural ability to resolve bacterial infections

Bacteria-Tox is a powerful homeopathic homaccord detoxifier specifically designed to assist in the resolution of bacterial infections. Homaccords of common bacterial nosodes, including *Streptococcus*, *Staphylococcus*, *Salmonella*, *E. coli* and Lyme Disease are included to alert the body to the potential presence of these organisms, allowing for appropriate drainage and detoxification. Homeopathic herbs and polychrests assist in the drainage and elimination of bacteria and their by-products at a deep cellular level, while sarcodes provide the blueprint of healthy tissue.

Bacteria-Tox provides multi-dimensional support for the resolution of complex bacterial infections, without the harmful side effects often associated with antibiotic therapy. Can be effectively imprinted with an imprinter (ex. WaveFront).

Ingredients:

Adrenal 3X, 6X
ATP 5X
BAC nosode 12X, 30X, 60X
Belladonna 6X, 12X
Commiphora myrrha 3X
Crotalus horridus 12X, 30X
Hydrastis canadensis 3X,

Hypericum perforatum 12X
Liver 3X, 6X
Lomatium dissectum 3X, 6X
Borrelia burgdorferi (Lyme) 12X, 30X, 200X
Mesenchyme 6X, 9X, 6C
Nasturtium officinale 3X

Phosphorus 12X
Spleen 5X
Tabebuia impetiginosa 3X
Thymus 5X
