

BioCatalase Liposome Lotion

Multi Purpose Topical (4 ounce tube)

Matrix Nutritionals Series

Joint, Muscle Pain, Inflammation, Fungal & Healing Delivery

This product was designed in support of patients who are working with any form of joint pain and/or inflammation. Natural botanical lipid emollients nourish and protect the skin with concentrated botanical nutrients which possess high levels of Cox-2 inhibition activity (Liangli Yu, Ph.D., University of Maryland). Strategically balanced, potentized homeopathics reset the ECM/ICM (extra and intracellular matrices) resolving signal rigidity and re-establishing disrupted cellular communication. High potent, proteolytic (pancreatin and other) enzymes are quickly transported via nanosphere liposomes to traumatized binding sites increasing tissue permeability and the rate of degradation of inflammatory and toxic products whilst simultaneously increasing the rate of micro-thrombi breakdown to reduce swelling. Natural antioxidants increase circulation and re-establish nourishing blood supply. BioCatalase can also be combined with specific homeopathics, botanicals and nutritionals to create custom use formulas. For example add 15 drops of Lapacho Intrinsic and 15 drops of Myco-Tox to create a powerful anti-fungal topical. BioCatalase is solid as a stand alone product and ideal for customization.

Patient Reference

BioCatalase is uniquely designed to support actual repair and not just for temporary symptomatic benefit. Real pain relief requires getting to where the pain begins - deep inside inflamed muscles and joints.

Inflammatory responses in the body can be triggered whenever body tissues are injured by physical trauma, intense heat, irritating chemicals, or by infection due to viruses, fungi and bacteria. This response assists the body to prevent the spread of damaging agents to nearby tissue, to eliminate cell debris and pathogens, and it sets the stage for the rebuilding process.

This remarkable nanosphere liposome lotion reduces inflammation & relieves pain by delivering proven compounds directly to the tissues being damaged. The lotion is packed with key nutrients that assist in reducing inflammatory mediators, feed cell membranes, support connective tissue repair and lubricate the joints thereby increasing flexibility.

The nanosphere liposome delivery system, carries the oil-based and water-based anti-inflammatory, pain relief, and anti-oxidant ingredients into deep tissue where they reinforce and lubricate cells. These strengthened cells are better able to resist additional rupture that causes pain and inflammation.

Most other "pain relief" topicals only touch the surface, masking pain by overloading dermal receptors.

BioCatalase's all-natural nanosphere liposomal delivery

system (phospholipids) penetrates deep into sore tissue to deliver pain-relieving and cell-enhancing ingredients directly to the cells that need it the most.

This unique, patented delivery system gives the remedy both a faster and longer-lasting effect by repairing deeper layers of tissue to reduce inflammation and relieve pain.

BioCatalase Liposome Lotion is a unique and welcome contribution to the healing arts' world. In addition to its rapid assimilability, the formula includes a conscientious blend of low potentized, proven homeopathics in concert with 10 high potency enzymes, anti-oxidants, eclectic penetrating oils, biological sulphur, and organic botanicals. By strategically combining specific eclectic oils and their natural synergies, we can optimize for clinical cosmeceutical benefits to complement the homeopathics, botanicals and deep reaching enzymes.

BioCatalase applies easily and will not stain clothes or clog fat cells. As an added benefit it leaves the skin feeling soft and supple due to its natural moisturizing effect. And it does not contain menthol! This means it is safe to use with homeopathics such as *Inflamma-Tox*.

A growing, pleasant heat is often felt when the ingredients have been successfully delivered to the binding site. This is due in part to a healing enzymatic reaction and the organic cayenne which draws blood to the site and "encourages" the natural anti-inflammatory processes of the body.

Ingredients

Arnica 3X
Calendula 1X
Hypericum 3X
Witch Hazel 1X

Bromelain
Pancreatin 8x USP
Superoxide Dismutase (SOD)

Emu Oil
Coconut Oil (Cocos Nucifera)
Safflower Seed Oil (Cathamus Tinctoris)
Tea Tree Leaf Oil (Melaleuca Alternifolia)
Vitamin E (Tocopheryl Acetate)

MSM (Methyl Sulfonyl Methane)
Boswellia Serrata Extract (standardized to 65% boswellic acids)
Cayenne (.01%) Capsaicin

Chamomilla Recutita (Matricaria) Flower Extract
Garlic Bulb Extract (Allium Sativum)
Willow Bark Extract (Salix Alba)
Feverfew Extract (Chrysanthemum Parthenium)
Wood Betony Extract (Stachys Officinalis)
