Detoxifier Homaccord Tincture

Candida (Major Strains) Detoxification

The Homeopathic Pharmacopoeia Convention of the United States defines detoxifier homaccords as "homeopathic attenuations of: pathological organs or tissues; causative agents such as bacteria, fungi, ova, parasites, virus particles, and yeast; disease products; excretions or secretions." Isopathic remedies share a close relationship with detoxifier homaccords, however, they emphasize substances taken and potentized from the patient's surround such as environmental toxins, metals, imponderables, etc. Detoxifiers presented in this section are a combination of classical homeopathic preparations in a 60 mL cobalt blue bottle (protects the remedy) which may include detoxifier homaccords isodes, sarcodes and potentized botanicals all designed to differentiate, constellate and amplify the keynote focus of the remedy. All ingredients are made from mother tinctures, hand diluted as per Hahnemann and hand succussed. Many are in multiple potencies known as homaccords to provide for the processes and patterns of homeopathic ascendancy. *Potentized Mesenchyme 6X, 9X, 6C and ATP 5X are included to assist in homeopathic ECM drainage and homeopathic empowerment.*

Candida is the popular term for candidiasis (candida overgrowth) - a condition first identified by American physicians in the 1970's. Moderate amounts of candida live in every one of us without causing any harm, but when given free rein to grow unchecked, e.g. by wiping out the surrounding bacteria with broad-spectrum antibiotics, Candida can change into its fungal form and spore through the intestinal wall into the rest of the body. Once through, it rampages around the body producing a multitude of symptoms.

Yeasts are opportunistic organisms. They are unable to create infection in normal healthy individuals, held in check by beneficial bacteria of the gastro-intestinal and genitourinary tracts. When the internal terrain becomes compromised however, Candida organisms are able to rapidly proliferate and colonize the mucous membranes of the oral cavity, gastro-intestinal tract and vagina, as well as grow in moist areas the skin.

Diets high in sugar and processed foods laden with antibiotics and growth hormones leave the body lacking the nutrients it requires for adequate digestion and immunity, while feeding yeast and other pathogenic organisms. Repeated exposure to antibiotics, birth control pills, hormone replacement drugs, heavy metals, environmental chemicals, stress and other xenobiotics further disrupts the internal terrain and weakens the body's defences, making one more susceptible to yeast overgrowth.

However, the presence of Candida is not a failure of defence, but a failure of internal regulation.

It has been known for decades that Candida flourishes in the presence of progesterone which explains why so many women

get outbreaks of thrush when pre-menstrual. Candida is not just the result of a faltering hormonal system, as it in turn aggravates the situation by binding to hormones, making them incapable of arriving at their target sites. Many 'symptoms of Candida' are in fact symptoms of the hormonal disruption that underlies Candida - and underlies other conditions as per the examples below.

Recurring digestive symptoms, constipation, bloating, sugar cravings, headaches, fatigue, muscle aches and pains, depression and memory impairment may all be symptoms of Candida overgrowth in the body. Menstrual irregularities, food and environmental sensitivities, chronic sinusitis and ADD/ADHD may have at their root a yeast overgrowth.

Can-Tox is a powerful homeopathic detoxifier homaccord specifically designed to assist in the resolution of most Candida strains. Homaccords for these Candida strains are included, along with specific fungal detoxifier homaccords, designed to alert the body to the potential presence of these organisms, and provide for appropriate drainage and detoxification. Homeopathic herbs assist in the drainage and elimination of Candida and their by-products at a deep cellular level, while sarcodes provide the blueprint of healthy tissue.

Can-Tox assists the regulatory systems in eliminating the major strains of Candida and supports the body in re-establishing a healthy and balanced terrain.

Ingredients:

Adrenal 3X, 6X
Astragalus menziesii 3X
ATP 6X, 9X, 6C
Bone marrow 8X
Borax veneta 4X, 8X, 12X
Candida 12X, 30X, 60X, 100X, 200X, 500X
Ceanothus 3X
Echinacea angustifolia 3X
Germanium sesquioxide 3X

Glitoxin 12X
Gonolobus condurango 3X
Hydrastis canadensis 3X
Kidney 3X, 6X
Ligusticum porteri 3X, 6X
Lomatium dissectum 3X
Lymph 3X, 6X
Mannan 4X
Mesenchyme 6X, 9X, 6C
Nasturtium aquaticum 3X
Phosphoricum acidum 12X

Phytolacca decandra 3X
Propolis 3X
Quercus glandium spiritus 3X
Spleen 3X, 6X
Tabebuia impetiginosa 3X
Thymus 3X, 6X
Triticum repens 3X
Uncaria tomentosa 1X
