

# Chanca Piedra Intrinsic

Concentrated Handcrafted Ethno Botanical Tincture 2 oz.  
Alchemically melded within a proprietary Signaling Matrix Base (SMB) of ancient deep sea and high mountain BioPhotonics, Shilajit, Fulvic & ionic trace minerals

## BioPhotonic Spagyric ethno-Intrinsic Botanical

## Kidney, Gall Bladder, Liver Decongestant

# Patient Reference

These unique high potency-low dose botanical handcrafted preparations are formulated in accordance with alchemical proven laws and processes established in classical times yet clinically relevant today. It may take 60-90 days to make the concentrated tincture which has been decanted into a 2 oz. cobalt blue bottle (protects the remedy). All raw materials are either organic, wildcrafted or bio-dynamically grown when available and draw from the finest ancient and modern traditions of herbal medicine from the West, Ayurvedic India, Middle East, South American Amazon, Australasia, Africa and Oriental TCM, composed in a **BioPhotonic Signaling Matrix Base (SMB)** of naturally occurring plant DNA vestiges, 70 ionic/electrolytic trace minerals, Fulvic/Humic acids, Himalayan Shilajit, dibenzo-alpha pyrones (chromoproteins), peptides, nucleic acids, amino acids. The name of the ethno-Intrinsic formula represents the core clinical intention which the accompanying resonant causal chain ingredients differentiate, to constellate and amplify, the plants' healing potential.

Chanca Piedra is the Spanish name given to the herb *Phyllanthus niruri* that is native to the Amazonian jungles. "Chanca Piedra" literally means "stonebreaker" reflected in its traditional use which may assist in the treatment of **kidney, gallbladder (and tonsil stones)**.

The kidneys are responsible for the regulation of water and electrolytes, pH balance, blood pressure, and blood glucose levels in the body. Waste products are filtered from the blood via the kidneys, where they are then passed from the body with the urine. The kidneys must maintain an adequate amount of water in the body to remove these waste products from the body (The body is a flow system). If dehydration occurs, high levels of substances that do not dissolve completely may form crystals that slowly build up into kidney stones.

**Kidney stones (renal calculi) are hardened mineral deposits that form in the kidney** when there is a high level of calcium (hypercalciuria), oxalate (hyperoxaluria), or uric acid (hyperuricosuria) in the urine, a lack of citrate in the urine, or insufficient water in the kidneys to dissolve waste products. Kidney stones originate as microscopic particles that develop into larger stones over time.

**Regardless of size, stones passing from the kidney to the bladder may become lodged in the ureter.** A lodged stone can block the flow of urine, causing pressure to build in the affected ureter and kidney. Increased pressure results in stretching and spasm, which cause severe pain that begins in the lower back and radiates to the side or groin.

**Used in conjunction with GB-40 Yuan Source and MetPhos, gallstone formation follows a similar pattern.** Research indicates that Chanca Piedra assists in reducing calcium levels in the urine, promoting the flow of bile through the gallbladder, inhibiting the formation of calcium oxalate crystals that make up kidney and gallbladder stones allowing them easier passage. Cholesterol plays a significant role. Review **GB-40 Yuan Source**

monograph for more detailed information re gallbladder decongestion to 1) increase bile flow 2) liquify and move the sludge 3) shrink the stones and 4) dump the bile. Again, the body is a flow system!

**Gallbladder stones are an extremely common disorder and are usually asymptomatic.** Some patients experience biliary colic, an intermittent and often severe pain in the epigastrium or right upper quadrant, and at times between the scapula because of temporary obstruction of the cystic duct with a gallstone.

An unhealthy sluggish biliary tree is often at the core of many seemingly unrelated conditions. When **intestinal barrier function is compromised ("leaky gut"), gut bacteria** that are normally confined to the intestinal lumen can cross the gut barrier and enter the bloodstream. The immune system sees these microbes and their microbial products as foreign invaders and quickly launches an immune response. This can affect the biliary system, as the resulting inflammatory signaling from such a microbial invasion has been shown to alter the gene expression and function of key transport systems involved in bile uptake and secretion in the liver .

**Gout is another condition, resulting from elevated uric acid levels in the body.** In this condition, crystals of monosodium urate or uric acid are deposited on the articular cartilage of joints, tendons and surrounding tissues, causing severe inflammation/pain. Untreated, the crystallized deposits (called tophi) can cause significant tissue damage. Gout results from a combination of elevated concentrations of uric acid and overall acidity in the bloodstream.

The BioPhotonic Spagyric botanicals in this formula have been selected for their diuretic, anti-inflammatory and lithotropic properties, as well as their strengthening and tonifying effect on the **kidneys, urinary system, gallbladder and liver.**

### Proprietary Blend of Causal Chain and SMB Ingredients:

Cleavers (aerial parts) *Galium Aparine*  
Chanca Piedra (aerial parts) *Phyllanthus Niruri*  
Celery (seed) *Apium Graveolens*  
Corn Silk (stigma) *Zea Mays*

★ Chinese Skullcap (root) *Scutellaria baccalensis*  
(replaces Khella root)  
Uva Ursi/ Bearberry (leaf) *Arctostaphylos Uva Ursi*  
Marshmallow (root) *Althaea Officinalis*  
Green Tea (leaf) *Camellia Sinensis*
