

# Chem-Tox

Concentrated Homeopathic Medicine  
2 oz. NPN 80046360

## Patient Reference

### Detoxifier Homaccord Tincture **Multiple Chemical Detoxification**

The Homeopathic Pharmacopoeia Convention of the United States defines nosodes as "homeopathic attenuations of: pathological organs or tissues; causative agents such as bacteria, fungi, ova, parasites, virus particles, and yeast; disease products; excretions or secretions." Isopathic remedies share a close relationship with nosodes, however, they emphasize substances taken and potentized from the patient's surround such as environmental toxins, metals, imponderables, etc. Detoxifiers presented in this section are a combination of classical homeopathic preparations in a 60 mL cobalt blue bottle (protects the remedy) which may include nosodes, isodes, sarcodes and potentized botanicals all designed to differentiate, constellate and amplify the keynote focus of the remedy. All ingredients are made from mother tinctures, hand diluted as per Hahnemann and hand succussed. Many are in multiple potencies known as homaccords to provide for the processes and patterns of homeopathic ascendancy. *Potentized Mesenchyme 6X, 9X, 6C and ATP 5X are included to assist in homeopathic ECM drainage and homeopathic empowerment.*

Drugs are generally defined as synthetic chemicals or substances that alter or change normal biochemical reactions of the body in order to achieve a desired result. For example, many street drugs act by altering the nervous system or brain chemistry to elicit feeling of euphoria, while pharmacological drugs act specifically on organs and systems to decrease pain, alter blood chemistry, regulate hormone production, or modify signal transduction pathways.

Synthetic chemical drugs are available to address almost any symptom. Conditions associated with weak digestion, overburdened detoxification pathways, or altered biological terrain are now being addressed with synthetic chemicals rather than diet and exercise. Pharmacological drugs are designed to work on a specific biochemical pathway. However, once in the body, they are able to exert effects on other pathways aside from the intended target, resulting in a variety of undesirable effects. Drugs are now prescribed to counter the side effects created by other medications a patient is taking, which further exacerbates the problem and leads to a deregulation of the normal biochemical pathways of the body.

Chronic use of synthetic chemical drugs, whether pharmacological or recreational in nature, leads to congestion and an overload of the body's detoxification systems. These synthetic chemicals place a strain on the liver, kidney and other organs of detoxification that attempt to metabolize these drugs in the body. As the organs of

detoxification become increasingly congested, toxins begin to accumulate in the tissues, creating another mechanism by which synthetic drugs disrupt normal cellular and biochemical functions.

*Chem-Tox* is a powerful homeopathic homaccord detoxifier specifically designed to assist in the elimination of congestion associated with pharmaceutical and recreational drug use. A proprietary blend of homaccords of many common pharmacological and recreational drugs alert the body to the presence of these substances to assist in their detoxification at a deep cellular level. Homeopathic herbs and polychrests help to decongest, repair and replenish detoxification pathways, while soothing the nervous system and assisting with withdrawal symptoms from addictive substances. Sarcodes provide the blueprint of healthy tissue and help to re-establish normal functioning of organs of elimination.

*Chem-Tox* provides full body support for effective elimination of congestion and repair of damaged detoxification pathways that can occur with pharmaceutical and recreational drug use.

#### Ingredients:

Adrenal 5X  
ATP 5X  
Arctium lappa 3X  
Belladonna 12X  
Chemical isodes 12X, 30X, 200X, 1M  
Glycyrrhiza glabra 3X  
Kidney 3X

Liver 3X  
Lycopodium clavatum 12X  
Lymph 3X  
Mesenchyme 6X, 9X, 6C  
Nitricum acidum 6X, 12X  
Nux vomica 12X  
Phosphoricum acidum 6X, 12X  
Phosphorus 12X

Phytolacca decandra 3X  
Rhamnus purshiana 3X  
Thyroid 5X  
Trifolium pratense 3X  
Triticum repens 3X
