

Circulo Code

New Zealand Organic Glandular Sarcodes

Concentrated Homeopathic Tincture 2 oz. NPN 80047555

Patient Reference

Organotherapy

Cardiac Circulation

In Greek, the term 'Sarcodes' means fleshy. Sarcodes imply protoplasm of animals, as distinguished from vegetable protoplasm. In homeopathy, some of the Sarcodes are proved medicines. They are obtained from healthy endocrine or ductless glands, or from normal secretions of living human organs and lower animals. The secretions are mostly hormones. As such, they are gainfully employed as homeopathic support and correction of the indicated substance through the provision of the correct oscillatory signature of what a healthy, well functioning gland or secretion should be. A strategic blend of X and CH potencies are present in the 60 mL cobalt blue bottle (protects the remedy) for this purpose, as are accompanying "classical homeopathic" remedies.

Note the addition of flower essences in some remedies, appropriate to the targeted gland, organ or system.

The idea of organotherapy was first introduced by Constantine Hering, M.D., the father of American Homeopathy, in 1834. This research has been continued now by prominent European, North and South American physicians and practitioners.

There are three proposed ways in which organotherapy is believed to work:

1. *It has a direct effect on stimulating the function of the organ by enhancing the selection of enzymes and specific nucleic acids lacking in the organ.*
2. *The administration of the homeopathic preparation of organ tissue overwhelms the body with organ antigen, in effect stopping the production of anti-organ antibodies.*
3. *The organotherapy remedy may provide antigen to substitute for damaged tissue antigen.*

We use low potentized botanicals, tissue salts and 6CH sarcodes, which are at the perfect homeopathic balance point between encouragement and regulation. (Typically 4CH and 5CH homeopathic potencies are used for stimulatory effects; 7CH is used for regulating the organ or tissue and 9CH as inhibitory).

Attempting to detoxify a weak or low functioning organ without first providing repair and nourishment will have detrimental effects, both physically and energetically, that may, in fact, push the organ deeper into failure.

The heart and blood vessels are collectively responsible for maintaining a continuous flow of blood through the body. The flow of blood through the circulatory system provides the tissues of the body with a regular supply of oxygen and nutrients and carries away carbon dioxide and other waste products.

The circulatory system is made up of two main parts:

1. The systemic circulation, which constitutes the blood supply to the entire body except the lungs;
2. The pulmonary circulation, which carries blood to and from the lungs, where its supply of oxygen is replenished.

On its journey from the heart to the tissues, the blood is forced along the arteries at high pressure. The return journey through the veins back to the heart however, occurs at low pressure and the blood is kept moving by contraction of the arm and leg muscles. Valves in the veins prevent the blood from flowing backwards. A sedentary lifestyle, as well as a preponderance of xenobiotic influences (i.e. heavy metals, mycoplasmas, virus, fungal/Candida, pesticides, parasites, etc.), may therefore be at the root of circulatory problems.

Poor circulation can result from, or indeed be a causative factor in, disorders of the arteries or veins, such as an abnormal narrowing of the blood vessels, resulting in reduced blood flow and possible tissue damage. It can also create an abnormal widening and thinning of the blood vessel walls, resulting in an increased risk of rupture.

Symptoms of poor circulation can range from Raynaud's disease to varicose veins, to chest pains and leg pains in cases of severe arteriosclerosis (thickening and loss of elasticity of the artery walls). Poor circulation is particularly prevalent in those who are overweight. Heavy smokers are advised to quit because nicotine reduces the blood circulation in the skin.

Circulo Code is a thoughtfully crafted homeopathic formula of low potentized sarcodes, botanicals, polychrests and minerals conscientiously prepared to provide effective support for cardiac circulation.

Ingredients:

Arnica montana 30X, 100X
ATP 5X, 8X, 30X
Aurum muriaticum 12X
Barium chloratum 12X
Bioflavonoids 3X

Borago officinalis 3X
Calcarea fluorica 6X
Cholesterinum 12X
Conium maculatum 12X
Crataegus oxyacantha 3X
Digitalis 6X

Fagopyrum esculentum 3X
Ferrum phosphate 6X
Ginkgo biloba 1X
Hamamelis virginiana 6X
Heart 6X, 6CH
Kali phosphoricum 6X

Natrum muriate 6X
Plumbum aceticum 12X
Thyroid 3X, 6X, 12X, 6CH
Ubiquinone 6X
