

# Echina Intrinsic

Concentrated Handcrafted Ethno Botanical Tincture  
60 mL/ 2 oz. NPN 80031125

## Patient Reference

### Intrinsic Spagyric Botanicals

### Immune Support

**The Intrinsic Spagyric Botanicals** are handmade remedies manufactured in accordance with the proven laws and time-honoured processes of Spagyricism, laid down hundreds of years ago. It takes 60-90 days to make the concentrated tincture which has been decanted into a 60mL cobalt blue bottle (protects the remedy). Labelling and bottling are performed without electricity. All raw materials are bio-dynamically grown or wildcrafted, and draw from the finest ancient and modern traditions of herbal medicine from the West, Ayurvedic India, South American Amazon, and Traditional Chinese Botanicals. The name of the (ethno) Intrinsic formulas represents the keynote focal remedy ingredients to which the other ingredients constellate, differentiate and amplify.

Echinacea has been the most frequently used plant by the early Native Americans for over 400 years. A favourite herb of Western, European, Ayurvedic and Traditional Chinese Medicine practitioners, it is the most popular immune herbal supplement in North America today.

Aside from being a wonderful nourishing herb and overall tonic for the body, Echinacea is most well known for its potent effects as an immune modulator. This mildly antiseptic herb exhibits anti-viral, anti-bacterial and anti-inflammatory properties, blood and lymphatic cleanser.

As a powerful immune modulator, Echinacea has traditionally been used to combat many infections, from the common cold and flu, to assisting in the natural support of serious illnesses such as HIV and Cancer. It has been used to treat yeast infections, respiratory infections, asthma, hay fever, allergies, bronchitis, urinary tract infections, tonsillitis, tuberculosis, meningitis, enlarged prostate, swollen lymph nodes and many other conditions.

Scientific research has shown that Echinacea stimulates the immune system in a number of ways:

- 1) Acts as a natural antibiotic to fight off a wide variety of infections
- 2) The phytochemical inulin enhances the ability of white blood cells to fight off infection
- 3) Increases the number of white blood cells available to combat infection and activates them, specifically T-Cells and Natural Killer (NK) cells
- 4) Its content of caffeic acid, cichoric acid, and echinacin kills viruses, similarly to the immune system's own interferon (IFN)
- 5) Increases the production of systemic interferon
- 6) Stimulates phagocytosis to fight off pathogens
- 7) Blocks viral receptor sites on the surface of the cell membranes to prevent infection

8) May suppresses tumour growth, making it a potential adjunct to cancer therapy

Echinacea has historically been referred to as the "King of the Blood Cleaners" due to its ability to filter and drain the lymphatic and circulatory systems. Its blood cleansing abilities make it useful to speed the healing of cuts, burns and wounds, and it is particularly effective at removing toxins and poisons from the body.

Echinacea has been shown to be effective for many arthritic conditions, as it supports collagen through the production of hyaluronic acid, supports synovial membrane healing and has cortisone-like activity.

*Echina Intrinsic* can help to modulate and tone T-cell response to invading pathogens, (especially in the face of a strong stimulus) and helps the immune system to operate more efficiently, thus taking away the extra stress on the body's systems.

*Echina Intrinsic* is an elegantly crafted remedy designed to support and modulate the immune system. The Spagyric formula is a combination of two powerful species of Echinacea: *Echinacea angustifolia*, *Echinacea purpurea*, well complemented by *Astragalus*, *Andrographis*, and *Holy Basil* (Tulsi).

A brief study of the formula will give you a deep appreciation of how important this particular Spagyric tincture is in your practice.

Our primary concern with this remedy is to provide a natural and effective approach to bring about an accurate immune response to the increasing onslaught of xenobiotics. Remember we are seeking to support the body's own natural defense mechanisms, not "over-amp" them!

#### Ingredients:

*Andrographis* (aerial parts) *Andrographis Paniculata*  
*Echinacea Angustifolia* (root) *Echinacea Angustifolia*  
*Astragalus* (root) *Astragalus Membraneceus*

*Holy Basil* (aerial parts) *Ocimum Tenuiflorum*  
*Echinacea Purpurea* (root) *Echinacea Purpurea*
