

Olive Leaf Intrinsic

Spagyric Handcrafted Olive Leaf Tincture from Greece
60 mL

Intrinsic Spagyric Botanicals

Anti-Microbial & Immune Support

Traditional Keynotes:

- Anti-microbial
- Bacteria
- Viruses
- Parasites
- Fungal Infections
- Candida
- Herpes
- Intermittent Claudication
- Heart & Circulatory Support

Complementary Remedies:

- Mycelia Intrinsic
- Wild Bear Garlic
- Inflamm Life Force
- LIFE Force
- Amoeba-Tox
- Para-Tox
- HZ-Tox
- Mono-Tox
- Viru-Tox
- Myco-Tox
- Can-Tox
- Mycoplasma-Tox
- Drainage Milieu

Dosage: One full dropper 2x daily in warm water, or as directed by a Health Care Practitioner

The Intrinsic Spagyric Botanicals are handmade remedies manufactured in accordance with the proven laws and time-honoured processes of Spagyricism, laid down hundreds of years ago. It takes 60-90 days to make the concentrated tincture which has been decanted into a 60mL cobalt blue bottle (protects the remedy). Labelling and bottling are performed without electricity. All raw materials are bio-dynamically grown or wildcrafted, and draw from the finest ancient and modern traditions of herbal medicine from the West, Ayurvedic India, South American Amazon, and Traditional Chinese Botanicals. The name of the (ethno) Intrinsic formulas represents the keynote focal remedy ingredients to which the other ingredients constellate, differentiate and amplify.

Anti-viral, anti-bacterial, anti-fungal, anti-parasitic and antioxidant, are just some of the labels that identify this herb and its many healing powers. Olive trees have been cultivated for over 3,000 years. The Egyptians regarded olive leaf as a symbol of heavenly power. The winners of the original Greek Olympics were crowned with a wreath of olive leaves as their reward.

The powerful disease-resistance properties of olive leaf are due to the bitter phenolic glucoside oleuropein. Oleuropein has natural antibiotic, anti-viral, anti-parasitic, and anti-fungal properties and exhibits powerful antioxidant properties shown to fight off free radical oxidation in the body. Studies illustrate that antioxidant activity is crucial to the management of viral diseases.

Research conducted in the late 1960's by Upjohn Pharmaceuticals found that olive leaf extract was capable of killing a large number of viruses. Research and clinical experience to date suggest that olive leaf extract is most effective on the category of viruses known as retroviruses due to its content of elenolic acid, a chemical compound of oleuropein found in the leaves.

Elenolic acid is a natural reverse transcriptase inhibitor (protease inhibitor), which means the olive leaf extract inhibits the process of the virus taking over the cell's DNA. It is important to note the term 'protease inhibitor' is used to define that the elenolic acid is inhibiting the protease made by the *virus*. It does not inhibit proteases taken as supplements or our own naturally produced proteases.

Some unique benefits of elenolic acid include:

- *Interferes with certain amino acid production processes necessary for the vitality of specific virus*
- *Interferes with viral infection and/or spread by*

inactivating viruses or by preventing virus shedding, budding, or assembly at the cell membrane

- *Has the ability to directly penetrate infected host cells and irreversibly inhibit viral replication*
- *Neutralizes production of reverse transcriptase and protease by retroviruses. These enzymes are essential for a retrovirus (eg. HIV) to alter RNA of a healthy cell.*
- *Provides direct stimulation of phagocytosis by the immune system*

Additional benefits of olive leaf extract include its ability to increase blood flow to the coronary arteries, relieve arrhythmias and treat intestinal muscle spasms.

Olive Leaf Intrinsic provides the highest quality organic olive leaf extract combined with premium quality green tea. The Spagyric processing ensures exceptional bioavailability of oleuropein in this formula, while the synergistic combination of olive leaf extract and green tea in this formula provides exceptional antioxidant support, as well as support for the immune and detoxifications systems.

Olive Leaf Intrinsic is an excellent addition to any healing strategy for a plethora of conditions, including bacterial, viral, parasitic, fungal, and Candida infection, and to provide support for the heart and circulatory system.
