

# Phyto Antiox

Highly Stabilized Spagyric Antioxidant Tincture  
60 mL/2 oz. NPN 80030108

Patient Reference

## Matrix Nutritional

## Spagyric Antioxidant Support

*Matrix Nutritionals Series* was designed as an eclectic offering for the Physica Energetics line of remedies primarily to assist in the “reactivation of the mesenchyme” (Dr. Reinhold Voll), via the nutritional complement pathways. These pathways are present in every system throughout the body and require balanced attention. In keeping with the principles of BioEnergetic Medicine, the remedies nourish and support these systems without punishing them with overstimulation or imbalancing factors, which, ultimately, is counterproductive. This approach has been carefully and respectfully designed to provide the necessary natural (organic where available), synergistic factors in proper energetic and biochemical ratios, to ensure assistance towards yielding a deep and lasting result. They are not to be confused with replacement therapy nutraceuticals that may seem to help for the moment, until the patient stops taking them or the condition is driven deeper. These remedies honour The Legacy of BioEnergetic Medicine, and are known by both patient and practitioner to be exceptionally effective.

Free radicals are highly reactive atoms and molecules that contain an unpaired electron. Able to join freely with other molecules, free radicals can cause a great deal of oxidative damage to the cells and tissues of the body. Attack by free radicals can lead to irreversible damage to the heart, nervous system and immune system. Scientists believe that free radical damage is the basis for the aging process.

Free radicals and reactive oxygen species (ROS) are a natural by-product of many biochemical processes. They are involved in signal transduction, enzyme activation and energy production. Free radicals produced by phagocytes during an immune response are essential for the destruction of invading bacteria and viruses. Under normal circumstances, the body's antioxidant stores are adequate to keep the free radicals and ROS in check, preventing them from causing damage to cells and tissues of the body.

When free radical levels increase due to exposure to radiation, ultraviolet rays, toxic chemicals, a diet high in fat, or a depletion of antioxidant stores, attack of cellular membranes, proteins and DNA by free radicals can occur. Oxidation of proteins results in damage to structural components and a breakdown of enzymatic functions in the body. Damage to cell membrane lipids make cellular membranes brittle and leaky, eventually leading to cell death and damage to DNA results in mutations in the genetic code and promotes the development of cancerous cells.

Free radical damage plays a role in the development of atherosclerosis, heart disease, Arthritis, Cancer, Diabetes, and Alzheimer's disease, etc.

Antioxidants are specialized molecules that are able to

neutralize free radicals, rendering them inert and assisting in their removal from the body. Vitamins A, C, E, beta-carotene and the mineral selenium are powerful natural antioxidants. Flavonoids are extremely potent plant antioxidants found in fruits, vegetables and many botanicals. Along with antioxidant properties, flavonoids act as powerful anti-bacterial and anti-parasitic compounds.

Glutathione, a powerful protein antioxidant produced by the liver, protects individual cells from oxidative damage and lends protection to the tissues of the cardiovascular system, kidneys, immune system, brain and lungs. Research has shown that the rate at which we age is directly correlated with the levels of reduced glutathione in cellular fluids. Enhancing glutathione levels in the body may have powerful anti-aging effects.

*Phyto Antiox* is a highly stabilized Spagyric antioxidant formula. Its combination of nutritional and herbal ingredients work synergistically to provide broad spectrum antioxidant support, while enhancing endogenous production of glutathione by the liver. Phytonutrient compounds support cardiovascular health, decreasing inflammation and lowering LDL cholesterol levels. Immune supportive compounds protect DNA from oxidation and disrupt the processes that lead to cancer.

*Phyto Antiox* is a central formula, assisting in the primary prevention of oxidative damage to the body and provide support to the liver, kidney, heart and immune system.

### Ingredients:

Açaí berry  
Ginkgo Biloba  
Grape Seed Extract (95% proanthocyanidins)  
Green Tea Extract (98% Catechins)

Milk Thistle  
Quercetin  
Turmeric (95% Tetrahydrocurcuminoids) 200 mg
