

An integral ingredient in the Restoring Cellular Communication Programme™

ReHydrate

Concentrated Homeopathic Tincture
60 mL NDC 54118-7970-2 / DIN HM 80022876

Drainage Tonifiers

Hydration Drainage & Tonification

Traditional Keynotes:

- Dehydration
- ADD/ADHD
- Depression
- Adjustments Not Holding
- Corrects “Left Spin” & “Switching”
- Elevated Blood Pressure
- Digestive Dysfunction
- Muscle Cramping / Pain
- PMS / Menopausal Disorders
- Chronic Fatigue Syndrome
- Adrenal Mineral Corticoid Support
- Edema (Non) Pitting
- Adult Onset Diabetes
- Renal Support

Successfully supports all therapies and should be used as an integral part of any health and wellness maintenance programme.

Posology: 15 drops in 1litre of water daily, or as directed by a Health Care Practitioner
Do not take sublingually.

Drainage and Tonification is central to the healing process. It is well understood that until the extra cellular matrix is clarified, there will not be complete cellular resolution. 1) BioToxicosis remedies such Lymph 1, 2, and 3 assist in the clarification of the systemic drainage pathways 2) Spagyric botanicals decongest, drain and detoxify at the physical level and 3) the Milieu Series provide homeopathic drainage at the point of focal interference. Utilizing this combination, the local and systemic ECM drainage pathways are liberated and healing is the natural outcome as obstacles to cure are no longer an issue.

As an added bonus feature, the Milieu Drainage Tonifiers also contain specific flower remedies designed to assist in the drainage and tonification of the emotional terrain.

Homeopathic drainage is considered to be a functional process, traditionally accomplished using low potentized remedies. Today, the increasing xenobiotic onslaught upon our world requires a more extended approach.

The Milieu Series of remedies was eclectically and thoughtfully crafted to provide a more global understanding of a case picture. The addition of complementary tonification factors assist in preparing the body for deeper, safe detoxification.

Each remedy provides gentle drainage and tonification, without causing the immediate release of cellular toxins, which can create additional complications for BioToxicosis and Homotoxicological processes.

A blend of low potentized, ascending homeopathic glands and hormones combine elegantly with Spagyric botanicals, polychrests, cell salts and flower essences to complete the case picture and ensure a well measured and proportionate response.

Western-approach clinicians report successful integration of the Milieu drainage and tonification remedies in acute situations related to the organ or causal chain indicated. TCM practitioners find that drainage remedies nourish the blood, chi, yin and yang. Similar results are reported in healing arts' approaches around the world, although with different “poetry”, including Ayurveda, South American traditional medicine, etc.

These unique remedies work exceptionally well in opening up conditions that are stuck or potentially clogged.

“You’re not sick—you’re thirsty! It is unintentional chronic dehydration (UDR) that causes pain and disease”

F. Batmanghelidj, M.D.
The Bodys’ Many Cries for Water

With two thirds of the earth's surface covered by water, and the human body consisting of 75 percent of it, it is evidently clear that water is one of the prime elements responsible for life on earth. Water circulates through the human body just as it does through the land, transporting, dissolving and replenishing nutrients and organic matter, while carrying away waste material. In the body, water regulates the activities of fluids, tissues, cells, lymph, blood and glandular secretions. An average adult body contains 42 litres of water, and with just a small loss of 2.7 litres, he or she can suffer from dehydration, displaying symptoms of irritability, fatigue, nervousness, dizziness, weakness, headaches and consequently reach a state of pathology.

- Blood = 82% water
- Lungs = 90% water
- Brain = 76% water
- Bones = 25% water

The beverages most people choose to consume are counter-productive to proper hydration. Coffee, tea, alcohol, and soft and sugary drinks are all diuretics, and will cause not only the loss of the water they are contained in, but they will also draw water from the body's reserves.

Clearly everyone needs ReHydrate!

Drinking water alone can sometimes be counter-productive, as it will decrease the osmolality (concentration of ions) of the extracellular fluid, signalling the kidney to let go of even more fluid to find balance. This “diluted blood” also tends to shut off the thirst mechanism.

Ingredients:

Adrenal 6X, 6CH
ATP 4X, 6X, 12X, 30X
Coffea cruda 1X
GABA 6X, 12X, 30X
Germanium sesquioxide 4X, 6X, 8X

Hypericum perforatum 3X, 6X, 12X
Hypothalamus 6X, 6CH
Kidney 6X, 6CH
Serotonin 6X, 12X, 30X
Taraxacum officinale 1X
Natrium muriaticum 6X

ReHydrate

Materia Medica

Adrenal (Sarcode) 6X, 6CH - Adrenal glands (also known as suprarenal glands) are chiefly responsible for regulating the stress response through the synthesis of corticosteroids and catecholamines, including cortisol and adrenaline, respectively. The adrenal glands are the body's main source of the hormones adrenaline (epinephrine) and noradrenaline (norepinephrine). These water-soluble hormones, derived from the amino acid tyrosine, are part of the fight or flight response initiated by the sympathetic nervous system.

ATP (Hormone Sarcode) 4X, 6X, 12X, 30X - Adenosine-5'-triphosphate (ATP) is a multifunctional nucleotide and is most important in cell biology as a coenzyme that is the "molecular unit of currency" of intracellular energy transfer. In this role, ATP transports chemical energy within cells for metabolism. ATP is made from adenosine diphosphate (ADP) or adenosine monophosphate (AMP), and its use in metabolism converts it back into these precursors. ATP is therefore continuously recycled in organisms, with the human body turning over its own weight in ATP each day.

Coffea cruda (Coffee unroasted) 1X - It is used for hypersensitivity to external impressions, insomnia, nervous agitation, anxiety, restlessness, nervous excitability and neuralgia.

GABA (Sarcode) 6X, 12X, 30X - Gamma-Amino Butyric acid is an amino acid which acts as a neurotransmitter in the central nervous system. It inhibits nerve transmission in the brain, calming nervous activity.

Germanium sesquioxide (Germanium) 4X, 6X, 8X - Germanium sesquioxide helps support the body's natural immune defenses. Germanium helps maintain the body's natural production of gamma interferon and natural killer cells. Studies indicate that germanium exhibits antioxidant potential.

Hypericum perforatum (St. John's Wort) 3X, 6X, 12X - St. John's Wort has been used for many centuries. Its uses are for mental disorders, nerve pain, as a sedative, sleep disorders and kidney/lung ailments. The sedative and painkiller action has helped a lot for relieving pain, especially chronic pain. It is used externally for bruises and hemorrhoids.

Hypothalamus (Sarcode) 6X, 6CH - One of the most important functions of the hypothalamus is to link the nervous system to the endocrine system via the pituitary gland (hypophysis). It is responsible for certain metabolic processes and other activities of the Autonomic Nervous System. It is an integral part of the Hypothalamus-Pituitary-Adrenal axis.

Kidney (Sarcode) 6X, 6CH - The kidneys are organs that have numerous biological roles. Their primary role is to maintain the homeostatic balance of bodily fluids by filtering and secreting metabolites (such as urea) and minerals from the blood and excreting them, along with water, as urine. Because the kidneys are poised to sense plasma concentrations of ions such as sodium, potassium, hydrogen, oxygen and compounds such as amino acids, creatinine, bicarbonate and glucose, they are important regulators of blood pressure, glucose metabolism and erythropoiesis (the process by which red blood cells (erythrocytes) are produced).

Serotonin (Sarcode) 6X, 12X, 30X - Serotonin (5-hydroxytryptamine, or 5-HT) is a monoamine neurotransmitter synthesized in serotonergic neurons in the central nervous system (CNS) and enterochromaffin cells in the gastrointestinal tract of humans and animals. In the CNS, serotonin plays an important role as a neurotransmitter in the modulation of anger, aggression, body temperature, mood, sleep, human sexuality, appetite and metabolism.

Taraxacum officinale (Dandelion) 1X - Dandelion is a rich source of vitamins A, B complex, C, and D, as well as minerals such as iron, potassium, and zinc. Dandelion is mainly used as an appetite stimulant, digestive aid and for liver and gallbladder function. Dandelion leaves are used as a diuretic to stimulate the excretion of urine and to support the kidneys and their functions.

Natrum muriaticum (Sodium Chloride) 6X - Homeopaths give this remedy for emotional problems, such as anxiety and depression. Natrum mur. is given for PMS, absent menstruation induced by shock or grief; irregular periods; and a general feeling of being unwell both before and after menstruation. It is also good for menopausal symptoms including, a dry or sore vagina, vaginal discharge, and vaginismus (vaginal pain during sexual intercourse).

Additional Ingredients:

Reverse osmosis water 68%

Ethanol 12%

Kosher glycerine from palm/or coconut oil 20%
