Detoxifier Homaccord Tincture

Kidney/Bladder Detoxification

The Homeopathic Pharmacopoeia Convention of the United States defines nosodes as "homeopathic attenuations of: pathological organs or tissues; causative agents such as bacteria, fungi, ova, parasites, virus particles, and yeast; disease products; excretions or secretions." Isopathic remedies share a close relationship with nosodes, however, they emphasize substances taken and potentized from the patient's surround such as environmental toxins, metals, imponderables, etc. Detoxifiers presented in this section are a combination of classical homeopathic preparations in a 60 mL cobalt blue bottle (protects the remedy) which may include nosodes, isodes, sarcodes and potentized botanicals all designed to differentiate, constellate and amplify the keynote focus of the remedy. All ingredients are made from mother tinctures, hand diluted as per Hahnemann and hand succussed. Many are in multiple potencies known as homaccords to provide for the processes and patterns of homeopathic ascendancy. *Potentized Mesenchyme 6X, 9X, 6C and ATP 5X are included to assist in homeopathic ECM drainage and homeopathic empowerment.*

The main function of the kidneys is to regulate the body's fluid balance and electrolyte levels and eliminate waste products. They perform these important tasks by filtering the blood and removing unnecessary water and soluble wastes. Excess amounts of minerals are also excreted in the urine. The complete blood supply passes through the kidneys every hour.

The kidneys are also involved in the regulation of blood pressure. They secrete a hormone called rennin, which causes the formation the hormone angiotensin in the blood. Angiotensin is a potent blood-vessel constrictor and acts to increase blood pressure.

The term nephritis denotes any condition characterized by inflammation of the kidneys.

Glomerulonephritis is inflammation of the glomeruli; the filtering units of the kidneys. This condition usually develops because of an immune response to infection. For example, infection with Streptococcus bacteria can precipitate glomerulonephritis, just as it can lead to rheumatic fever. Symptoms may include fluid retention and bloating, decreased frequency of urination, nausea and vomiting, fever, exhaustion, abdominal and/or lower back pain, elevated blood pressure and dark or bloody urine.

Pyelonephritis refers to inflammation of the entire kidney and the renal pelvis. This condition can cause chills, fever, pain, nausea and vomiting.

Kidney problems are often a complication of other disorders, such as diabetes, lupus, high blood pressure, and liver disease. Exposure to certain drugs or toxins can also lead to kidney disease.

If kidney function is seriously impaired, toxic wastes cannot be properly eliminated and may accumulate in the blood stream, resulting in uremic poisoning. An elevated BTA urine resistivity is indicative of renal congestion and inability to concentrate urine.

Urinary tract infections are usually caused by bacteria from the bowel that live on the skin near the rectum or near the vagina. Because the openings of the bowel, vagina and urethra are close together, it is easy for the bacteria to spread from the bowel to the urethra and travel up the urinary tract into the bladder, sometimes into the kidneys. Urinary tract infections that migrate upwards can cause a variety of kidney diseases and disorders.

Normal urine is sterile, containing fluid, salts and waste products. Infections can come from a variety of bacteria that normally live in the digestive system, or from sexually transmitted microorganisms such as Chlamydia and mycoplasmas.

Acupuncture meridian sites located on the top and bottom front four teeth are specific to the kidneys and bladder. It is useful to rule out root canals, amalgams, heavy metals, fillings and other dental toxins when working with these meridians. Other considerations include allergies, viruses (i.e. coxsackie), molds, fungus and Candida.

Rena-Tox is a unique homeopathic homaccord detoxifier designed to support kidney and bladder detoxification and congestion at a deep, cellular level.

Ingredients:

Apis mellifica 6X, 12X
Asperigus officinalis 3X
ATP 5X
Barosma betulina 3X
Berberis vulgaris 1X
Bladder 10X, 30X, 60X

Bryonia alba 12X
Cantharis 8X, 12X, 30C
Echinacea angustifolia 3X
Eupatorium purpureum 6X
Kali chloride 3X
Kidney 5X, 3C
Mercurius corrosives 12X

Mesenchyme 6X, 9X, 6C
Metal isodes 30X, 60X, 100X
Pareira brava 6X
Petroleum 8X
Proteus mirabilis 12X
Sabal serrulata 3X
Solidago virgaurea 3X

Staphysagria 12X
Taraxacum officinale 3X, 6X
Triticum repens 3X
Uva ursi 3X
Viral nosodes 30X, 60X, 200X
