### Additional Notes:

Many practitioners give the **Ultimate Flowers** and **Ultimate Rescue** together. Ultimate Flowers works at the deeper chronic levels while the **Ultimate Rescue** Remedy provides immediate support throughout the day.

**Posology:** One full dropper as needed directly into mouth or in warm water or in a spray "mister" to clear the field, or as directed by a Health Care Practitioner

**Ultimate Flowers are homeopathic, spagyric preparations** in a 60 mL cobalt blue bottle (protects the remedy) of the emotional flower remedies that were initially attributed to Dr Bach. These quasi-nosodes are all in the 30CH potency and were designed specifically to be a **STAND ALONE REMEDY** as well as being custom potentized or custom grafted. EAV practitioners can make a dilution of the flower essences already in the formula and imprint the frequency(s) into the Ultimate Rescue thereby fully customizing an emotional remedy for the patient in specific homaccord potencies. Eg. Star of Bethlehem 60X, 200CH, 1M. Other practitioners may wish to "graft" from a flower remedy or essence (3 drops) into the Ultimate Rescue to accomplish a somewhat similar purpose.

**Note: Pineal 6CH and Thymus 6CH sarcodes have been added to the Ultimate Fields and Ultimate Rescue.** The pineal gland is the focal point for the endocrine system through which the Vital Force specifically differentiates and the thymus gland represents the subconscious access and pathways. ATP 5X is present for homeopathic empowerment factors/Krebs cycle.

### The link between emotions and physical illness has been known for over 2000 years.

The oldest literature linking emotions and illness dates back to the Greek physician Galen (129-200 AD), who noted that the women suffering from melancholy were more susceptible to Cancer. Writings from the early 18th and 19th century show links between the emotions of grief, frustration and misery and the development of cancerous tumors. Hans Seyle, twentieth century father of the General Adaptation Syndrome, coined the term "Diseases of Adaptation" to describe conditions which result from prolonged exposure to stress.

### Autoimmune diseases, Arthritis, Chronic Fatigue, Cancer, etc. have all been linked to strong emotions,

such as anger, frustration, despair and helplessness. It is thus apparent that any therapies able to assist the body in dealing with these emotions would play a role both prophylactically and as an adjunct to any form of treatment for such diseases.

*Many practitioners report using the Ultimate Rescue with the Ultimate Fields. The Ultimate Rescue is used to handle any surfacing patterns that may arise due to the deeper working nature of the Ultimate Fields.*

### Ultimate Rescue is a Spagyric blend of five emotional flower essences that

combine elegantly to provide immediate support for acute stress of all kinds. The five flower essences contained in this remedy help calm the mind and body in times of shock, trauma, anxiety and fear, grief, nervousness, etc. The subtle vibrational energies of the flower essences assist in realigning the emotional patterns of dysfunction, thus facilitating the return of physical and mental vitality.

### The nervous system, endocrine system, and immune system

are all involved in the biological stress response. Research has found that emotions such as anger, worry, fear and feelings of helplessness or despair can elicit a biological stress response similar to the fight-or-flight response. While this response is indispensable in times of imminent danger, enabling the body to respond appropriately to deal with the stressor, in today's society, where most stressors are more emotional in nature, the fight-or-flight response is neither useful nor appropriate. Stress leads to the disruption of the body's homeostasis and chronic disturbances of homeostasis ultimately lead to dysfunction and disease.

### Ultimate Rescue is useful in emergency situations and acute stress reactions.

It is equally effective in support of the emotional energetics that may surface during the various phases of the healing process and through which patients/clients will undoubtedly go as they progress along their healing protocols.
